

HUMANE CHOICE WILDLIFE SERVICES

(833) 348-6263

Safe and sound solutions for all wildlife problems. From mice to mountain lions.™

• Natural • Ethical • No Poison

Our Philosophy

Our aim is to provide superior solutions to protect people, pets and property, while, at the same time, respecting the environment and our native wildlife.

Trapping and killing wildlife is an outdated practice that does not address the cause or source of a wildlife conflict.

We focus on what's attracting an animal and enabling its unwanted behavior, for sound and long-lasting results.

• *Property Inspections*

Most situations require an on-site inspection to determine the appropriate course of action. When conducting an inspection we take in the whole environment, looking for signs of why and how animals are intruding or causing damage. Once completed, we provide a plan for resolving the problem permanently and humanely, with an estimate of associated costs.

• *Animal Removal*

We use a variety of humane techniques to remove animals from yards and structures, depending on the species and time of year. If dependent young are present, we take precautions to keep the family together and unharmed.

• *Damage Repair & Cleanup*

We provide expert repair of damaged areas, like structural breaches in buildings. We also offer cleanup and sanitizing.

• *Owls for gopher and rodent control*

We install barn owl nest boxes to attract owls. Barn owls are superior hunters and are an excellent way to control rodent populations naturally.

Melissa Van Siclen, Owner / Wildlife Technician

I am thrilled to be offering options for resolving wildlife conflicts that protect people, pets, property, and our native wildlife. ~ Melissa
